

GKD: Sustainable solutions for sewage sludge dewatering and drying

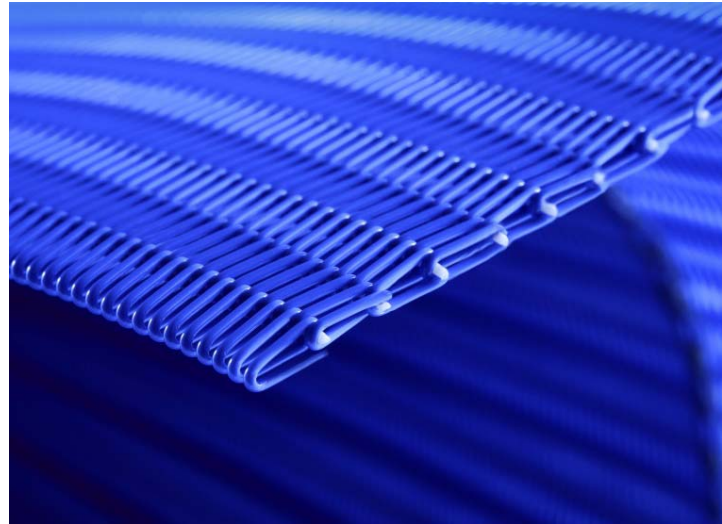

High performance, long service life, low disposal effort

WORLD WIDE WEAVE

Picture 1: The efficiency of the belt type 1003, developed for mechanical dewatering in belt presses, is unparalleled – thanks to the flat, particularly robust PAD seam

Picture 2: Spiral fabrics from GKD, designed to suit specific processes for thickeners or belt presses, have proven very successful for complicated, fibrous sludges in particular.

Picture 3: Air permeable and with high lateral and dimensional stability, dryer belts from GKD guarantee sewage sludge drying in high or low temperature dryers that is just as cost-saving as it is environmentally friendly.
