

## Mining in focus

Process belt solutions for added productivity and yield

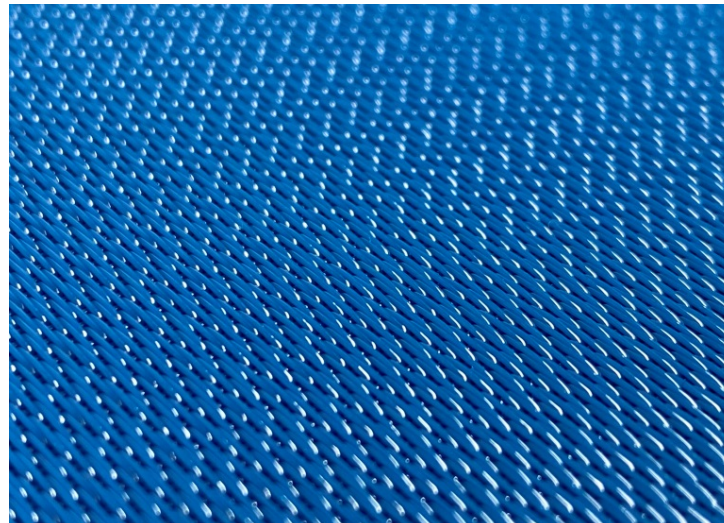

Picture1: For dewatering lithium carbonate the VACUBELT® 2015 filter belt with 50 µm aperture is used.

Picture 3: The single-ply vacuum filter belts of the type 1003 from GKD guarantee constant high dewatering performance.

Picture 2: Even on large system widths of up to 4.35 meters and belt lengths of over 70 meters, the VACUBELT® 2015 filter belt with a PAD seam loses none of its stability.

Picture 4: The VACUBELT® 3356 belt type has also proven itself many times over for phosphogypsum dewatering.

## Mining in focus

Process belt solutions for added productivity and yield

Picture 5: The VACUBELT® 5060 filter belt from GKD has been well established in potash fertilizer production for years thanks to its high temperature and abrasion resistance.

Picture 6: The VACUBELT® 3354 is a proven alternative to common products made of polypropylene in cooling lubricant filtration.
