

GKD at FILTECH 2019: Integrated filtration expertise
 Process belt solutions for the environmental and mining industry

WORLD WIDE WEAVE

Picture 1: Filler threads are inserted into the PAD seam from GKD before the clamps are closed thereby further lowering the risk of particle penetration.

Picture 2: Single-ply vacuum filter belts of the type VACUBELT® from GKD are specifically designed for particular processes and thermally treated for the dewatering of phosphogypsum.

Picture 3: In potash fertilizer production, the VACUBELT® 5060 filter belt from GKD has proven its worth many times over.

Picture 4: The VACUBELT® 2015 filter belt from GKD has been the globally established standard in the field of FGDP gypsum dewatering for many years.

GKD at FILTECH 2019: Integrated filtration expertise

Process belt solutions for the environmental and mining industry

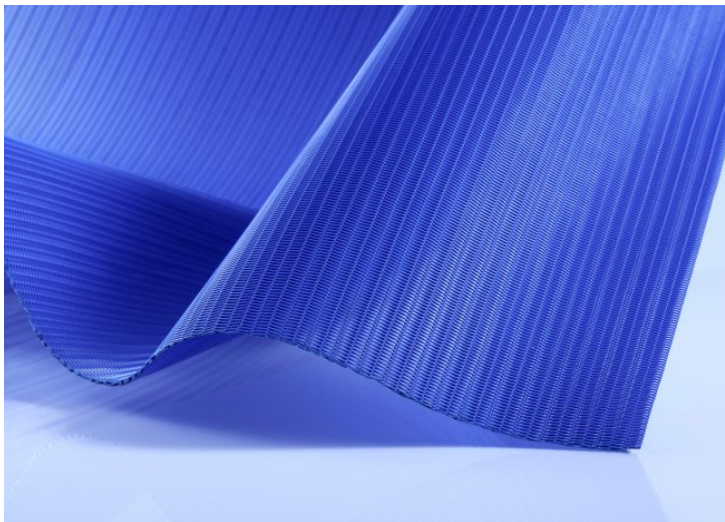

WORLD WIDE WEAVE

Picture 5: The VACUBELT® 2015 filter belt from GKD is currently setting new standards in lithium dewatering in vacuum drum filters.

Picture 6: In cooling lubricant filtration, the robust VACUBELT® 3354 filter belt from GKD reliably retains swarf and particles abraded from the grinding wheel.

Picture 7: Spiral fabrics from GKD for process water treatment with particles larger than 500 µm.
