

A clean performance

Optimised plain dutch weaves in an industrial laundry

WORLD WIDE WEAVE

Picture 1: The Aquastream Filter extractors filter 20m³/h at the washer for special laundry.

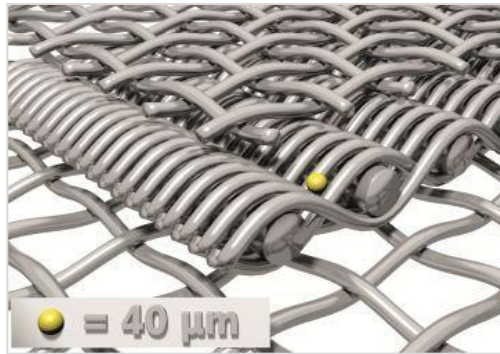

Picture 2: Aquastream Filter in the batch washer removes the washing water from foreign substances like lint and hair.

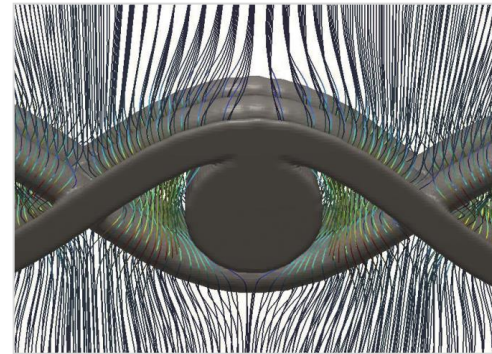

Picture 3: Self-cleaning Rotary Drum Filter of Aquastream with optimised plain dutch weaves (ODW) by GKD.

Picture 4: The Aquastream 1.5 Rotary Drum Filter cleans all the washing water and system water.

Picture 5: The optimised plain dutch weaves by GKD have a pore size from 10 to 50 µm.

Picture 6: CFD-simulation of an Optimized Dutch Weave made by GKD.

A clean performance

Optimised plain dutch weaves in an industrial laundry

WORLD WIDE WEAVE

Picture 7: With their absolute mesh size of just 35 µm, the optimised plain dutch weaves by GKD retain even the finest of particles.

Picture 8: The dry linen is sorted by hand ready for the subsequent processing stages.

Picture 9: Loaded into a new set of automatically guided transport sacks, the batches are then passed on the respective ironer line.

Picture 10-12: The laundry is hung per hand on the clips or hangers of the conveyor system and passes in sequence through a range of ironers where they are also directly folded.

Picture 13: Around 150,000 items are processed per day in the industrial laundry.
