

GKD: Breaking new ground in the analytics of microplastic

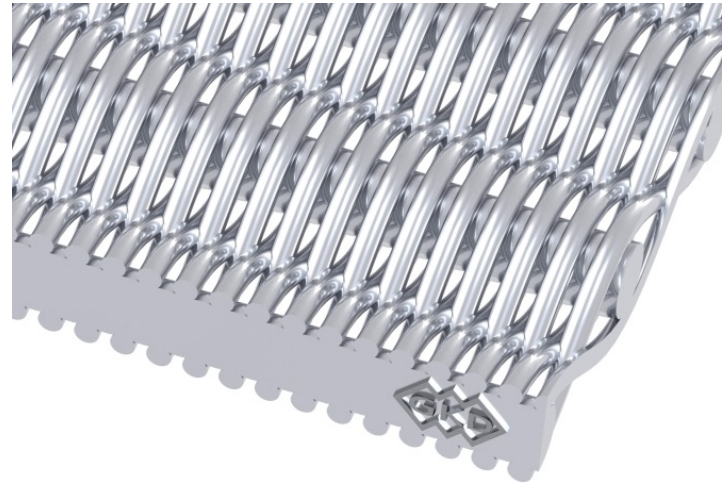

Fractionated filtration with stainless steel mesh

WORLD WIDE WEAVE

Picture 1: With their ODW 6 optimized dutch weaves, GKD developed a stainless steel mesh that sets unparalleled standards for flow rate and retention.

Picture 2: Optimized dutch weaves from GKD are characterized by significantly more and finer weft than warp wires.

Picture 3: Using a procedure developed in-house, which determines the bubble point with the help of CFD simulations, GKD can determine every pore size quickly and reliably.

Picture 4: During the RAU project, GKD developed a sampling basket that is used in conventional street drains instead of the usual leaf collecting baskets.
