

## Successful trade fair appearance

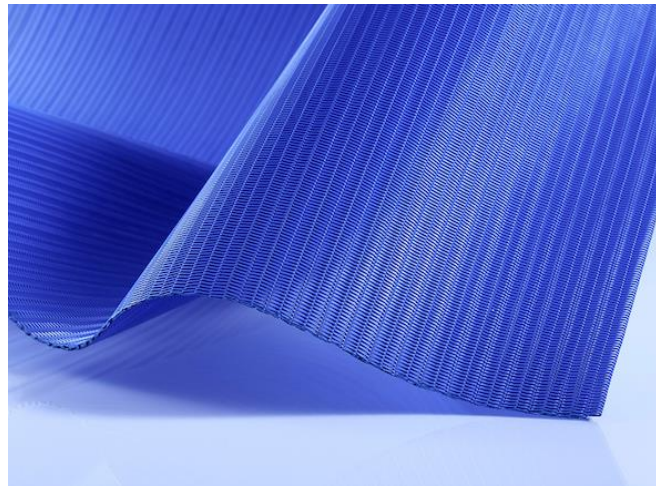

GKD generates great interest in its solutions for the nonwovens industry

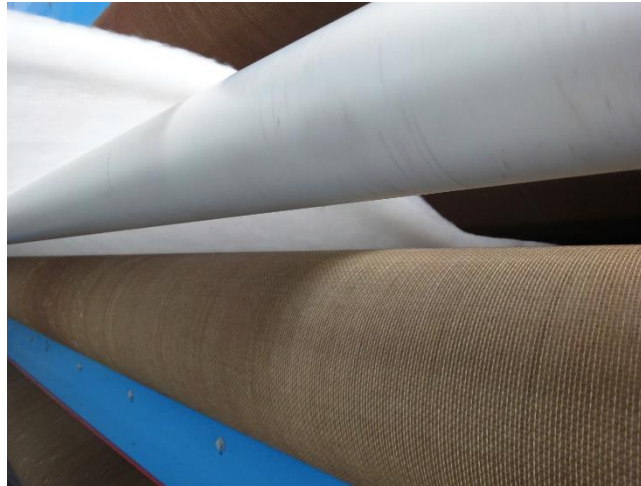

Picture 1: Thanks to the special topography of its belt surface, the new CONDUCTIVE 2215 process belt fabric from GKD guarantees precise deposit without fiber entanglement or fiber loss during nonwoven forming with airlay and meltblown processes.

Picture 2: In double-belt ovens, the glass hybrid fabric belts with full anti-stick coating from GKD contribute to a significant increase in production speeds and cost-effectiveness..

Picture 3: The field-proven spiral belts, which are manufactured in-house at GKD, employ a customer-specific design and guarantee reliable converting processes.

Picture 4: GKD uses its comprehensive engineering and process expertise to develop product-specific and system-specific belt designs.
