

GKD: AQUATECH Amsterdam, a resounding success

Major interest in woven filter media for key environmental issues

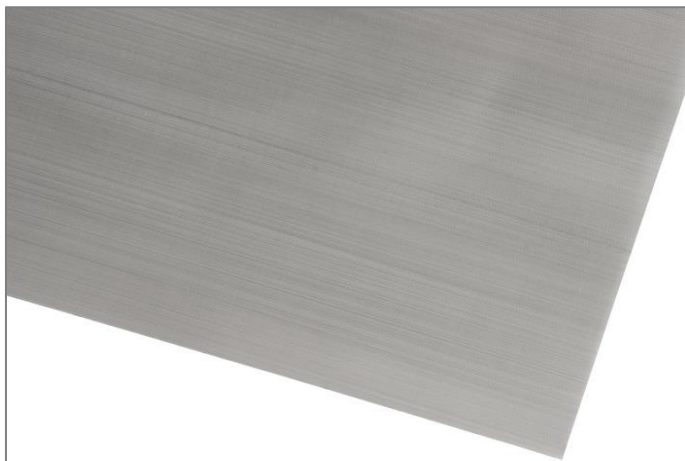

Image 1: In the water industry, stainless steel Optimized Dutch Weaves from GKD are synonymous with efficiency.

Image 2: Stainless steel Porometric mesh from GKD, with pore openings of 13 - 25 μm , is currently considered the best product on the market for water filtration.

Image 3: Optimized Dutch Weave with a 5 μm -pore size is the core element of the measuring crucible for sampling and analyzing aqueous liquids GKD developed this product in conjunction with the German Federal Institute for Materials Research and Testing (BAM) and the German Federal Environmental Agency (UBA).

Image 4: This sampling basket with integrated filter cascade, developed by GKD, enables scientific sampling of road runoff or seepage water
